Energy Saving, Maintenance Free Windows at an Economical Price

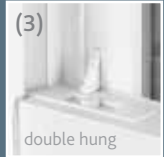

Features

Vinyl compound retains its pristine appearance for a lifetime.

Fusion welded frame and sash corners are strong and free from gaps. Corners are not compromised with knock outs or gaps. (1)
Lift rails are part of sash extrusion, not added later. (2)

Recessed tilt latches allow both sash to tilt inside for easy cleaning. Sash **limit locks** allow secure partial opening for ventilation. (3)

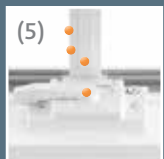

Continuous over/under interlock at meeting rails prevents air infiltration. (4)

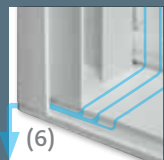

Heavy duty sash locks are secure and air tight (5) with cam action lock and keeper. Two locks standard in windows >=26"

EnergySMART® Intercept® insulated glass spacer blocks temperature transfer and reduces condensation.

Standard Patented Roller Tilt® 1/2" Constant Force Balance System Springs travel with the sash. This allows the sash to operate with significantly less friction and noise.

Sloped one piece sill for positive water drain-off, no water leaks at the sill. (6)

Screen Options

BetterVUE® Screen Mesh Better Insect Screen

- 10% Better Insect Protection
- 20% Better Airflow
- 20% Clearer View
